

Catalog of DAC Telephony Dictation and Transcription Equipment

Company History: Since 1992 Digital Accessories Corporation (DAC) has manufactured and sold over 35,000 pieces of dictation and transcription equipment. We have been committed to providing only the highest quality products to our customers.

Current and New Offerings: This brochure highlights the current line of DAC products, as well as some of our exciting, new additions. Our most popular telephone input station, the DA-110R (below), has proved to be the perfect solution for many hospitals and clinics.

Features -

- Record and Playback controls on handset for convenient use
- Excellent record and playback sound quality
- Compatible with telephone lines, extensions or a direct wire
- 10 One-Touch dialers for customization and ease of use

Presenting the New **DA-113SM** Telephone Type Microphone Input Station

This exciting new product includes a single Slide Control hand mic and 10 One Touch programable dialers for Work Types, Authors IDs, and other functions. The DA-113SM is also available with a built in barcode scanner in the hand mic.

Features -

- Excellent record and playback sound quality
- Compatible with telephone lines, extensions or a direct wire
- 10 One-Touch dialers for customization and ease of use
- Single slide control eliminates cumbersome buttons
- Attractive, modern design

- Optional Barcode Scanner Mic perfect for medical applications
- Easily scan patient numbers, Work Types, and IDs that had to be manually entered previously
- Backed by DAC's record of quality and satisfaction

Presenting the **DA-113HF** "Hands Free" Telephone Input Station

Dictating should never be an inconvenience. So, for those who need their hands for work, there is a solution. The DA-113HF package provides several possible alternatives that are sure to accommodate every profession out there, all completely "Hands Free".

Features -

- Complete Hands Free package with your choice of microphone and foot pedal for dictation
- 10 one-touch dialers for IDs, commands and routine entries
- Compatible with telephone lines, extensions or a direct wire

- Long, adjustable Goose Neck Mic can pick up dictation from several feet away
- Clip-On Mic allows excellent sound quality and clips to your clothing or work instrument
- Both the Standard (bottom left) and Waterproof (bottom right) foot pedals make for easy dictation with Play, Record and Next Job functions
- USB versions of both foot pedals are also available

DAC Telephony Transcription
