

## Digta Conference Station

### Digta Conference Station “Audio radar” at the conference table

The Digta Conference Station offers an optimum solution for recording conferences of up to 20 persons. During the recording the device uses radar-like technology to focus specifically on the person speaking.

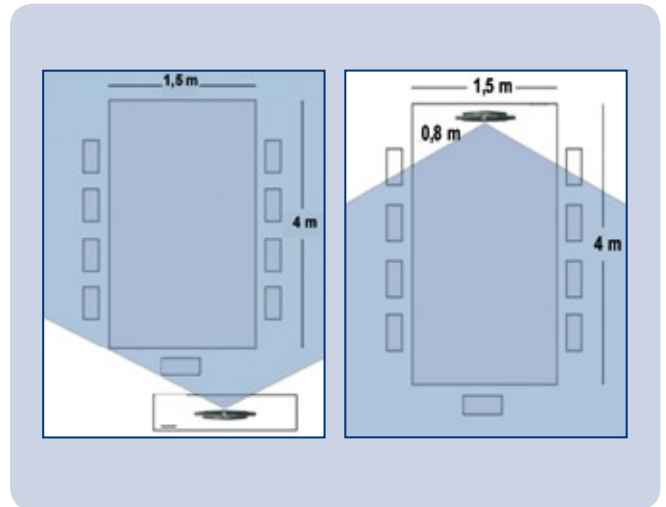

- An array of eight microphones
- Reduction of sound interference during recordings
- The device can be placed at a distance of up to 10 m from the meeting participants
- Excellent sound quality
- Special alignment of microphone output level for best recordings with digital dictation machines

## Digta Conference Station

### Installation

### Positioning in a room

### Technical Data
