

OLYMPUS AS-4000 PRO LINE PROFESSIONAL DIGITAL TRANSCRIPTION SYSTEM

The **Olympus DSS Player Pro** is specifically designed for digital transcription from your PC. It is easy to set-up and simple to use. The **DSS Player Pro Software** provides a powerful full featured transcription package with rewind, fast forward, automatic back Space (reverse time), volume and speed control for efficient transcription anytime from your PC. The easy to view transcription window lists dictation jobs and their length, and the adjustments for playback speed, volume and automatic back space are easily accomplished on screen.

Everything you need for professional transcription is provided in the **Olympus DSS Player Pro Transcribe Kit**.

- Simple to Install and Set-up
 - Easy to Learn and Use
- Increased Productivity and Speed
- Play and Transcribe .dss and .wav Files
- Easily Convert .dss Files to .wav Files

Olympus AS-4000 DSS Player Pro Software v.4

Features:

- Channel Separation

The DSS Player Pro Transcription Kit Includes:

- 1 each DSS Player Pro Software - version 4
- 1 each Olympus heavy-duty three position foot pedal (Model RS-26)
- 1 each Olympus professional stereo type headset (Model E-61)
- 1 each serial (RS-232C) connecting cable
- 1 each USB connecting cable

Olympus AS-4000 Standard Features:

- View: author identification, time/date, recording length, work types and priority
- Job status: finished, pending or cancel job
- File management through separate folders in/out trays
- Scan for fast review of all voice files
- Playback speed control, fast forward, automatic reverse-time

The **Olympus AS-4000** consists of a 3 position footswitch, professional transcription headset and **DSS Player Pro**, version 4, transcription software. The **AS-4000 Transcription Kit** is simple to install and easy to use. For example, in and out trays facilitate document management while job status information (finished, pending and cancel job) gives you an immediate overview. The automation of work processes - such as the receipt and redirection of dictations to corresponding in-trays via FTP, POP3, STMP or network - is also possible. Designed to work seamlessly with the **DS-4000**.

The DSS Player Pro Software v.4 also supports the Olympus digital recorders listed below:
